

CLAIMS

What is claimed is:

1. Arrangement for reducing or destroying germs in body cavities, e.g. the female vagina, characterized in that it is formed from a shaped body (3) which is introduced into the body cavity and contacts the surrounding tissue and which is made of a medically acceptable metal, e.g. fine silver.
2. Arrangement according to claim 1, characterized in that the shaped body (3) has an outer perimeter in direct contact with the surrounding tissue or liquid when used in the body cavity, e.g. vagina (1).
3. Arrangement according to claim 1 or 2, characterized in that the shaped body (3) is configured as hollow body or spiral.
4. Arrangement according to one of the claims 1 to 3, characterized in that a thread (4) or flexible wire, in particular silver wire, is attached to the shaped body (3) for recapturing the shaped body from the body cavity.

ABSTRACT

The invention relates to an arrangement for reducing or destroying germs in body cavities, e.g., vagina (1), wherein the arrangement is formed by a shaped body (3) which is introduced into the body cavity and contacts the surrounding tissue and which is made of a medically acceptable metal, e.g. fine silver.
